Re: Organic COP update

Growers and processors in the BC certified organic chicken sector,

Due to delays in Serecon's attempt to obtain the required data from a number of organic chicken growers, the promised update to the organic cost of production formula has once again been postponed.

Serecon has advised our office that as of late last week they are now in receipt of all of the required data which will now be compiled and analyzed.

As soon as the update has been completed it will be circulated to the BCCMB Price and Production Advisory Committee ("PPAC") for discussion prior to being forwarded to the Board for endorsement and implementation.

It is our intention to have the updated COP completed and approved for use in period A-169 which commences on April 11, 2021.

Thank you for your attention to this matter.

B. Vanderspek
Executive Director
BC Chicken Marketing Board
