3. Pricing formula:

The pricing formula that has been used to establish the minimum live price for period A-181 is comprised of the following components with prior approval of BCFIRB granted June 28, 2022, August 25, 2022, December 13, 2022 and February 7, 2023:

- The Ontario live price at their 2.15 – 2.45 kilogram weight category, **Plus**,
- The current BC catching cost of \$0.04 per kilogram, **Plus**,
- 75% of the difference in the cost of feed and chicks per kilogram, **Plus**
- A provision to cover 50% of the current formula costs exceeding the upper guardrail after adjustment for the cumulative increase or decrease in Ontario grower margins arising from changes to the Ontario Cost of Production formula (COPF) starting in A-181. *If the resulting number is negative, no adjustment will be made to the live weight price.*

The numbers indicated by the formula to calculate the A-181 minimum live price:

Minus CFO modular loading recovery	\$0.0120	
Minus CFO AI Insurance recovery	\$0.0015

Total differential over Ontario GREATER THAN Upper Guardrail - use Upper Guardrail	\$0.1284	= B
Differential over upper guardrail = (Total differential over Ontario - Upper Guardrail)	\$0.1061	
50% of Differential over Upper Guardrail =	\$0.0530	
Ontario Producer Margin Period A-180	\$0.6384	
Ontario Producer Margin Period A-181	\$0.6290	
Change to Ontario's Producer Margin (margin adjustment is negative - not used in formula)	-\$0.0094	
BCFIRB February 7, 2023 Prior Approval A-181 Interim Pricing Formula: = (Differential over upper guardrail - Change to Ontario's Producer Margin = 0)	\$0.1061
