**2. Levies:** A levy of \$0.0206 on all payable weight is to be deducted from the grower by the processor and remitted to the BCCMB as per Part 14 Fees and Levies of the BCCMB General Orders. Please note there is a levy increase in A-189 of \$0.0002. Official notice has been sent.

BC Levy Rate Breakdown:

|               |                                   |
|---------------|-----------------------------------|

**3. Pricing formula:**

The pricing formula that has been used to establish the minimum live price for period A-189 is comprised of the following components with prior approval of BCFIRB granted June 28, 2022, August 25, 2022, December 13, 2022, February 7, 2023 and April 3, 2023:

- The Ontario live price at their 2.15 – 2.45 kilogram weight category, **Plus**,
- The current BC catching cost of \$0.0485 per kilogram, **Plus**,
- 75% of the difference in the cost of feed and chicks per kilogram, **Plus**
- The addition of a trigger mechanism to determine when 50% of the current formula costs exceeding the upper guardrail is appropriate to include in the interim pricing formula to account for the wheat-corn gap. The trigger will be a cost gap of \$115.23 between Ontario and BC feed costs per tonne. If the trigger threshold is not met, no adjustment will be made to the live price. If the trigger threshold is met, provisions to cover 50% of the formula costs exceeding the upper guardrail will be made.
- If the above trigger mechanism is met, a provision to cover 50% of the current formula costs exceeding the upper guardrail after adjustment for the cumulative increase or decrease in Ontario grower margins arising from changes to the Ontario Cost of Production formula (COPF) starting in A-181. If the resulting number is negative, no adjustment will be made to the live weight price. (The upper guardrail is currently set at 13.69 cents/kg and the lower guardrail at 10.90 cents/kg due to the increase in the catching costs).
